

Clinical Assistant Professor, Respiratory Therapy Programs  
Department of Applied Physiology, Health, and Clinical Sciences

**Position:** Full-time, 9-month Clinical Assistant Professor, Respiratory Therapy Programs, Department of Applied Physiology, Health, and Clinical Sciences starting August 2022. Multiple positions are available.

**Responsibilities:** The position is responsible for advising and teaching specialized undergraduate and graduate courses; may serve as practicum coordinator within respiratory care programs, and have the potential to become the BSRT Program Coordinator. The successful candidate will provide professional service and contribute to the University's Diversity Plan. The successful candidate for this position will engage in high-quality teaching and will participate in departmental governance, research and scholarship, and service activities.

**Required Qualifications:** Masters required in respiratory care, health science, education, or a related discipline from an accepted institutional accredited college or university. Minimum of four (4) years of experience as an RRT, physician (MD or DO), or physician assistant of which at least two (2) years must include experience in clinical respiratory care, pulmonary medicine, cardiothoracic surgery, critical care, anesthesiology, healthcare administration, or healthcare research. An active practitioner license or eligible to obtain a license in North Carolina. Minimum of two years of teaching experience in clinical respiratory care, research, management, or education.

**Preferred Qualifications:** A doctoral degree in a related field from an accepted institutional accredited college or university. Clinical expertise in adult critical care, neonatal/pediatric critical care, sleep, or asthma education and credentials in the area of expertise (e.g., NPS, ACCS, CPFT/RPFT, SDS/RPSGT, AE-C, etc). Experience with distance education instruction. Demonstrated scholarship activity (e.g., record of success in professional journal publications, abstract poster presentations, and other professional presentations).

**Highlights of the Position:** The respiratory therapy degree advancement programs at UNC Charlotte are among only 16 programs with CoARC accreditation status, with the MSRC program being one of only four in the country. We offer an AS to MSRC option that allows students with an associate degree in respiratory therapy to complete the BSRT and MSRC requirements in three years 100% online. The program faculty work collaboratively to create and offer dynamic programs to help students achieve their professional goals and meet the needs of the profession.

**Required Documents:**

- 1) Current resume or curriculum vitae
- 2) Cover letter / letter of interest
- 3) Unofficial transcripts
- 4) Contact information for three references
- 5) Research interest statement: please include a brief history of any past research and scholarship experience (*e.g., journal publication, abstract poster presentation at a conference, or other professional presentation*), any current research and scholarship activities (*e.g., publications under review, upcoming abstract poster presentation at a conference, or collaborations*) and the future work you are interested in completing (*not to exceed two single-spaced page*).

Clinical Assistant Professor, Respiratory Therapy Programs  
Department of Applied Physiology, Health, and Clinical Sciences

6) Teaching philosophy: please include highlights of your beliefs about effective and engaging teaching and learning, provide examples to illustrate your current practices, and how you will implement those practices in the context of respiratory therapy education, including how you may incorporate a commitment to diversity (*not to exceed two single-spaced pages*).

**Campus Position Requirements:** The successful candidate will be expected to live within a reasonable driving distance from campus to maintain a regular campus presence to engage in teaching, service, scholarship, and collegial collaboration.

**Campus Interview Requirements:** The University of North Carolina at Charlotte is currently operating in-person at full capacity, so selected finalists should expect to travel to campus for an in-person interview and to follow University safety and social-distancing guidelines while on campus. Charlotte's policies related to COVID-19 are informed by the recommendations of experts from the Centers for Disease Control, the American College Health Association, OSHA, and local and state public health officials.

**Questions:** To inquire confidentially about the position, please contact Brian Ring, Search Committee Chair, at [bjring@uncc.edu](mailto:bjring@uncc.edu).

**Salary:** Salary will be competitive and commensurate with experience.
