

Visiting Professor Opportunity

The Department of Cardiorespiratory Care at the University of South Alabama (Mobile, AL) is welcoming applications for “visiting professor” opportunities. As we seek to increase the size of our faculty, we are inviting aspiring or current respiratory therapy faculty to our campus, expenses paid, to present at our annual community education seminar on September 20 and 21, 2018. While this is not a formal search process, we are seeking faculty who are considering relocating and becoming a Department Chair, Director of Clinical Education, or faculty member of our baccalaureate respiratory care program. Each invited colleague will have an opportunity to visit with our faculty and students, and to learn about our College of Allied Health, clinical facilities and beautiful Gulf Coast region. To apply, please submit a letter of interest with three or more one-hour topics of your choice. The letter should include a current CV. Reply by July 1, 2018 to:

Tim Op't Holt, EdD, RRT, AE-C, FAARC
Chair and Professor
